Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7-10, 22-25 and 37-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Cahn et al (US 5,535,278).

Regarding claims 7, 22 and 37, Cahn discloses a mixer circuit 160 for mixing a received sample with coefficients and generating a mixer signal at a clock frequency, as shown in figure 14A. The received signal is transmitted from GPS satellites (column 1, lines 38-44). The output of the mixer is provided to a carrier NCO 176 and generates a signal that is input to look-up table 162 (column 18, lines 28-43). The look-up table inputs a signal to mixer 160.

Regarding claims 8-10, 23-25 and 38-40, Cahn discloses the mixer circuit comprises in-phase and quadrature components and the look-up table 162 is a sin cos look-up table.

Allowable Subject Matter

3. Claims 1-6, 16-21 and 31-36 are allowed.
4. Claims 11-15, 26-30 and 41-45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lennen (US 5,708,439) in figures 1 and 8; Kohli et al (US 5,901,171) in figure 6 and column 19; and Lennen (US 6,888,879) in figure 7 and 8 disclose GPS receivers comprising a carrier NCO comprising mixer circuits and look-up tables.
